ABSTRACT

Virus Buster (VRB) is the 1st decentralized token that employs both Black Hole tokenomics and full automated liquidity generation mechanism on BSC network. The deployment of the contract and the launch of the protocol embark a new chapter for the blockchain ecosystem.

In addition to this, Virus Buster (VRB) is a crypto of the people, and for the people. It's 100% community driven by developers and fans all around the world. In essence, the community decides the future of the Virus Buster (VRB) token.

Also, we not only hold monthly events to bring love to the environment, we also partnered with multiple non-profit organizations to raise funds for the government's' effort to fight the pandemic.

VIRUS BUSTER (VRB) CARE

CORE MISSION

Our core mission is to have a lasting impact on the environment, where we could continue to live in a green eco-friendly world, and that in our generations to come, they, too will be able to continue living in an eco-friendly world. If you are an interested organization with goals that align with ours, and you would like to partner with Virus Buster, please feel free to reach out to us, as listed in the contact form.

CARE, LOVE & GIVE BACK

1ST MISSION

Our first step to achieving this mission is a *$150,000 donation to the most affected countries, namely India, Indonesia, Malaysia or any other needful country. The donation will help fund the government's' efforts to fight the pandemic, and also to be contributed to help to purchase more health equipment and vaccine in the name of Virus Buster!

*Mission is to collect a certain amount of donation to assist the most affected countries...

2ND MISSION

Virus Buster will set up bi-weekly re-occurring donations to our partners in other part of country to help support reduce the pandemic situation, there.

VIRUS BUSTER (VRB)
CARE OUTLINE

Creating Value & Creating Eco-Friendly World For Generations to Come

By utilizing the 1% tax for our charity fund effectively, Virus Buster Token will become a revolving door of value and charity for years to come. A 100% of the fund will always be donated to nonprofits and organized efforts to reduce & eliminate the virus spreading around the world. This is our core mission – to have a lasting impact on our environment. We want to create a cleaner Earth, for us and the generations to come.

By utilizing the 5% tax for our development fund effectively, we will take this funds to finance any and all development related to the project. This includes, but is not limited to:

• Listing on exchanges, increasing accessibility to Virus Buster while adding volume and value

• Partnering with top-tier influencers who can become spokespeople for Virus Buster and our mission

• Funding community giveaways that drive engagement and spread awareness of Virus Buster

• Direct advertisement via marketing campaigns; buying digital ad space, commercials, hosting events, etc

• Paying developers to create value-adding products for Virus Buster, such as our own exchange, a Virus Buster game, and our NFT marketplace

• Other avenues of revenue that we may brainstorm as we progress, such as integrating products into our merchandise store

How Does It Works
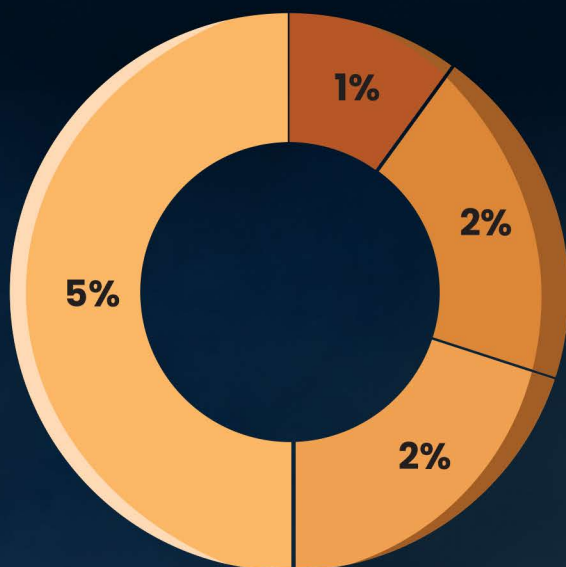

5% DEVELOPMENT

45% LIQUIDITY

50% BURN

TOTAL SUPPLY:
1,000,000,000,000,000 VRB

ANTI WHALE MECHANISM

As a start, to prevent whale holders, liquidity will be gradually added to a total of 10% of the entire token supply. And over the course of development and growth in community, more and more liquidity will be added gradually to allow more VRB folks to participate with equal opportunity. The mechanism is described below:

In essence, this is a 100% community driven project, so we need 100% community intelligence to make the best decision. First month (2021/11), team will exercise rhythmic slow boost algorithm, and use the token returned to add liquidity. Every following month, we will let community to decide and propose innovative ways to determine how and how many tokens to be added, to help Virus Buster (VRB) to the Moon.

**TAX ALLOCATION:
10%**

1% CHARITY

1% of every transaction is charity(timelock 6 mth/1 year)
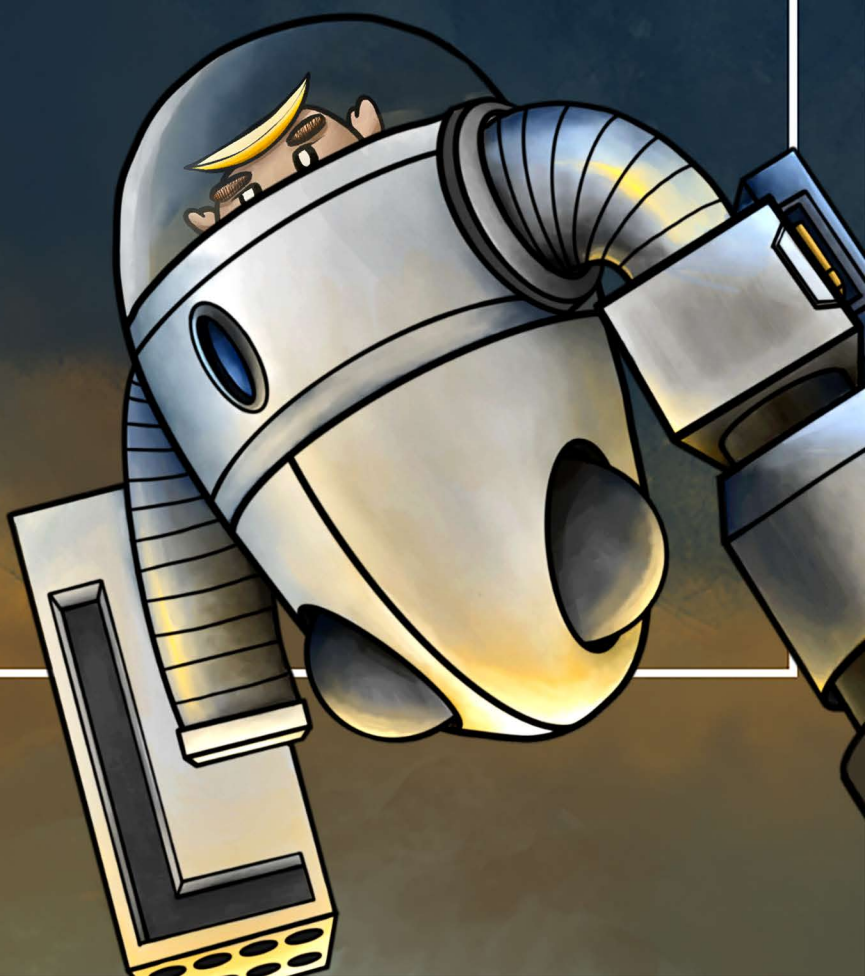

2% LIQUIDITY POOL

2% of every transaction is collected and locked as liquidity in the liquidity pool, creating an ever-rising price floor

2% MARKETING

2% of every transaction is for marketing
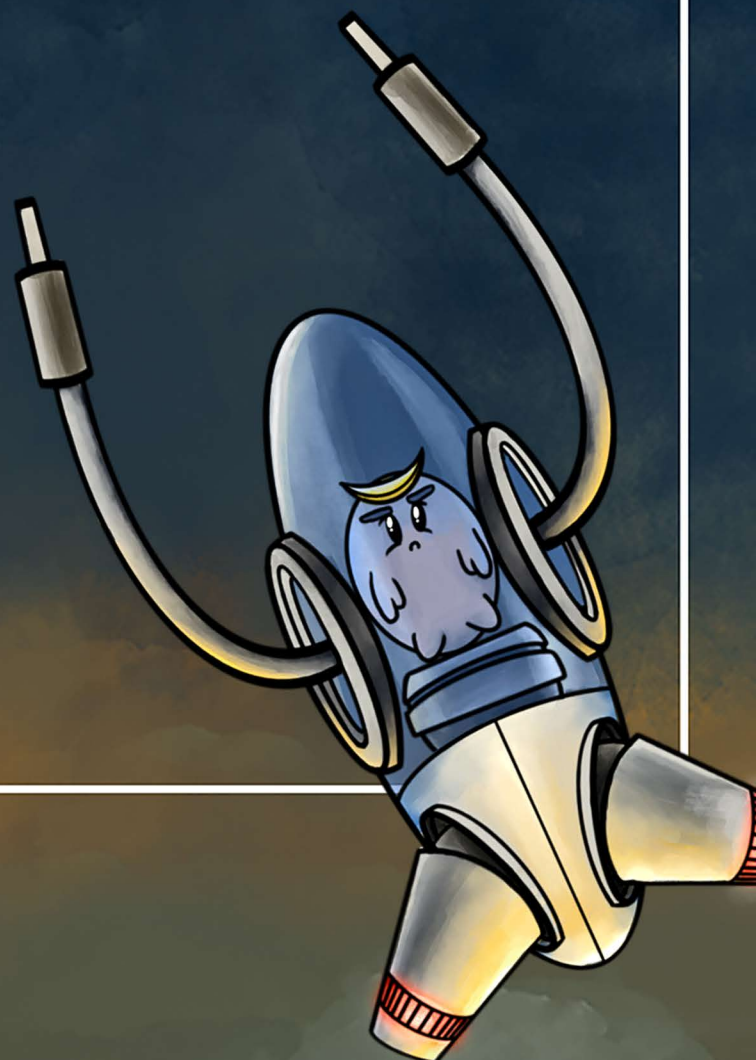

5% BACK TO HOLDERS

5% of all transactions are distributed to holders including the Black Hole resulting in steady growth of the token price and exponential burn of the token supply

DIMINISHING TRANSACTION FEE

Some may argue a deflationary token has liquidity, and a 10% transaction fee collection will prevent people from using the token. And here's the catch. By design, the token starts with a 10% transaction fee. However, the transaction fee will decrease gradually and approach to 0%

Overtime especially when it lists on centralized exchanges like Binance and Coinbase. And how much it decrease will be decided by the holders of the Virus Buster (VRB) token! Yes, it's a 100% community driven token and the community will decide the future of the Virus Buster (VRB)
